Professional Summary

Full-Stack **MERN Developer** with **2+ years of experience** building and delivering production-ready web applications using **MongoDB, Express.js, React.js, and Node.js**. Skilled in **RESTful API development, JWT authentication, Role-Based Access Control**, and React performance optimization. Improved average API response time by **30%** and reduced page load time by **40%** through frontend and backend optimizations. Experienced in delivering end-to-end features, from database schema design and API development to deployment, while collaborating in **Agile/Scrum** teams.

Technical Skills

Frontend	:	React.js, Redux Toolkit, Bootstrap, React Hooks, Tailwind CSS, HTML5, CSS3
Languages	:	JavaScript, Java, TypeScript
Backend	:	Node.js, Express.js
Databases	:	MongoDB, Mongoose, MySQL, SQL, Redis
API Development	:	RESTful APIs, CRUD Operations, JWT Authentication
Dev Tools	:	Git, GitHub, Docker, Postman, VS Code
Deployment	:	Docker, Vercel, Netlify, GitHub
AI & LLM	:	Generative AI, LLMs, Retrieval-Augmented Generation (RAG), Prompt Engineering
AI Tools	:	ChatGPT, Claude, GitHub Copilot, Google Gemini, Devin, AI-Assisted Coding & Debugging

Experience

Software Developer May 2024 – Present
Verifacts Services Pvt. Ltd. *Bangalore, Karnataka, India*

- Built and deployed **full-stack MERN applications** used across client operations, cutting manual workflow time by **40%** for end users
- Designed **15+ RESTful API endpoints** in Node.js and Express.js, improving frontend-backend communication and reducing average API response time by **30%**
- Modeled **MongoDB schemas** with Mongoose for large production datasets, using indexing and query optimization to reduce query latency
- Refactored **React.js** UI using Hooks and Redux, improving page load speed by **40%** and reducing unnecessary re-renders
- Implemented **JWT and bcrypt authentication** with **Role-Based Access Control (RBAC)**, securing access across multiple user roles and closing key security gaps identified during review
- Delivered features on time across **10+ Agile/Scrum sprints** and regularly reviewed pull requests to maintain code quality and consistency
- Managed version control and collaborative development workflows using **Git and GitHub**

Education

Sambharam Institute Of Technology Bangalore, Karnataka, India
Bachelor of Engineering (B.E) in Computer Science and Engineering (CSE) *2019 – 2023*

Projects

VIBE – Support Ticket Portal *React.js, Node.js, Express.js, MongoDB*

- Developed a **full-stack MERN application** for ticket creation, assignment, workflow transitions, and real-time tracking, reducing manual data input time by **30%**
- Built interactive dashboards with **dynamic Excel report generation** and advanced filters (date, status, assignee); integrated **third-party verification APIs** with email notification triggers for ticket lifecycle events, improving data accuracy by **25%**
- Optimized application performance through **MongoDB query tuning** and efficient API handling, reducing latency and ensuring scalability across frontend and backend

ShopHappily – E-Commerce Platform *MERN, Redis, Docker, RAG, LLM*

- Built a **full-stack MERN e-commerce application** with **role-based Admin and Customer portals**: admins manage the product catalog (add, update, delete), while customers browse, search, and purchase products
- Developed an **AI shopping chatbot** using **RAG and LLMs** that answers customer queries on product availability and return policy using store data as context, reducing hallucinated responses
- Implemented **Redis caching** to speed up frequently accessed product data and containerized the application with **Docker Desktop** for consistent development and deployment environments
